

## THE CB CASED COMPRESSOR RANGE

The Cased compressor range has been developed by CB Developments over a number of years to provide a ready to use compressor kit which can be carried in a vehicle with no extra parts required. Simply connect the crocodile clips to the vehicle's power supply and use the tyre inflator on a coiled extension lead.

These compressors are housed in military specification cases for go-anywhere use.

OEM compressors can be used for direct tyre inflation, or to fill vehicle air systems as required.

The capacities available are:

### SENIOR

Voltage:	12v and 24v dc
Duty Cycle:	100%
Free Air Delivery (FAD):	4/5 cfm (12/24v)
Current draw:	45A
Power:	¾ hp
Weight:	13 kg.
Maximum Pressure:	150 psi
Inflate 7.50R16 Tyre 0-50 psi:	4.5/3.5 mins

### JUNIOR

Voltage:	12v dc
Duty Cycle:	50%
Free Air Delivery (FAD):	2.9 cfm
Current draw:	20A
Power:	1/4 hp
Weight:	7 kg.
Maximum Pressure:	150 psi
Inflate 7.50R16 Tyre 0-50 psi:	8 mins

### ATOMAIRE TWIN

Voltage:	12v dc
Duty Cycle:	50%
Free Air Delivery (FAD):	2x0.9 cfm
Current draw:	16A
Power:	2x1/8 hp
Weight:	5 kg.
Maximum Pressure:	220 psi
Inflate 7.50R16 Tyre 0-50 psi:	7.5 mins
